

Daybreak Announces Update to the Fall Drilling Program at its California East Slopes Oil Project

SPOKANE, Washington, November 13, 2013 -- Daybreak Oil and Gas, Inc. (OTC: DBRM) (“Daybreak” or the “Company”), a Washington corporation, is pleased to announce the drilling of a second successful oil well in the fall drilling program at the East Slopes Project located in Kern County, California. The Bear #9 well was drilled to 2,200 feet and encountered approximately 10 feet of oil pay in the Vedder Sand. This well will be completed following the completion of the Bear #8 well, which is currently underway. Production results will be announced on both wells following production testing. The Bear #10 well, which is the final well of this three well drilling program, was drilled to 2,200 feet. The well did not encounter any oil bearing sand and was plugged and abandoned. The Company owns a 37.5% working interest in the Bear wells.

James. F. Westmoreland, President and Chief Executive Officer, commented, “With every well we drill, we gain valuable information about the oil reservoirs in the area. We knew we were exploring the outer limits of the Bear reservoir with the Bear #10 well, and while we are disappointed in the results of the Bear #10 well, we do have a number of viable locations left to drill at the Bear property. Also, we are in the process of obtaining final permits to begin developing our Ball property, and we look forward to the start of drilling scheduled for the spring of 2014.”

Daybreak Oil and Gas, Inc. is an independent oil and gas company currently engaged in the exploration, development and production of oil and gas in California and Kentucky. The Company is headquartered in Spokane, Washington with an operations office in Friendswood, Texas. Daybreak owns a 3-D seismic survey that encompasses 20,000 acres over 32 square miles with approximately 13,000 acres under lease in the San Joaquin Valley of California. Daybreak also owns a 25% working interest in approximately 6,100 acres under lease in the Appalachian Basin in Lawrence County, Kentucky.

Certain statements contained in this press release constitute “forward-looking statements” as defined by the Securities and Exchange Commission. Such statements can be identified by the use of forward-looking terminology such as “believe,” “expect,” “may,” “should,” “up to,” “approximately,” “likely,” or “anticipates” or the negative thereof. These forward-looking statements are based on our current expectations, assumptions, estimates and projections for the future of our business and our industry and are not statements of historical fact. Such forward-looking statements include, but are not limited to, statements about our expectations regarding our financing, our future operating results, our future capital expenditures, our expansion and growth of operations and our future investments in and acquisitions of oil and natural gas properties. We have based these forward-looking statements on assumptions and analyses made in light of our experience and our perception of historical trends, current conditions, and expected future developments. However, you should be aware that these forward-looking statements are only our predictions and we cannot guarantee any such outcomes. Future events and actual results may differ materially from the results set forth in or implied in the forward-looking statements. The following factors, among others, could cause actual results to differ from those set forth in the forward-looking statements: general economic and business conditions; exposure to market risks in our financial instruments; fluctuations in worldwide prices and demand for oil and natural gas; fluctuations in the levels of our oil and natural gas exploration and development activities; our ability to find, acquire and develop oil and gas properties, including the ability to develop the East Slopes Project prospects; risks associated with oil and natural gas exploration and development activities; competition for raw materials and customers in the oil and natural gas industry; technological changes and developments in the oil and natural gas industry; legislative and regulatory uncertainties, including proposed changes to federal tax law and climate change legislation, and potential environmental liabilities; our ability to continue as a going concern; and our ability to secure additional capital to fund operations. Additional factors that may affect future results are contained in our filings with the Securities and Exchange Commission (“SEC”) and are available at the SEC’s web site <http://www.sec.gov>. Daybreak Oil and Gas, Inc. disclaims any obligation to update and revise statements contained in this press release based on new information or otherwise.
